

Venkata Murali Kumar Chintala

Technical Lead

📍 Hyderabad, India | 📞 +91-9989225431 | ✉️ muralikumar.ch@gmail.com | 🌐 chvmuralikumar

👤 PROFESSIONAL PROFILE

Highly accomplished Technical Lead with 15+ years of experience driving the creation of high-quality, scalable tech products across EdTech, Healthcare, and Banking domains. Proven track record of leading and mentoring dynamic software engineering teams to build engaging platform modules for global learners. Deep polyglot expertise combining advanced proficiency in Python ecosystems with a robust foundation in enterprise Java/Spring Boot architecture. Expert in end-to-end RESTful API development and rigorous code reviews to ensure error-free deliverables. Adept at leveraging cloud platforms (AWS/Azure), containerization, and various databases to architect highly available microservices and seamless cross-functional integrations.

🏢 PROFESSIONAL EXPERIENCE

Technical Lead

RCG Global Services

July 2025 – Present

Chennai, Remote, India

- Directed cross-functional engineering pods, serving as the primary design and architecture authority for scaling resilient, high-availability enterprise platforms using Java, Spring Boot, Angular, and Azure microservices.
- Spearheaded an Agentic AI services ecosystem with strong command of Gen AI engineering patterns: prompt engineering, chain-of-thought reasoning, tool/function calling, vector embeddings, semantic search, and agent memory architectures.
- Maintained hands-on technical leadership applying excellent Python engineering skills, including async programming and API development (FastAPI), to build inference-ready microservices and manage diverse database environments.
- Accelerated Agile delivery by implementing the AILDC Framework to supercharge the SDLC, integrating AI assistants (GitHub Copilot, Claude Code) as collaborative team members across functional design, coding, testing, and operations.
- Elevated overall software quality and team velocity by enforcing Test-Driven Development (TDD), conducting rigorous architecture reviews, and modernizing CI/CD pipelines using Azure DevOps.
- Mentored and guided diverse engineering teams, bridging the gap between traditional enterprise architecture and emerging AI technologies to foster a culture of continuous innovation and technical ownership.

Principal Software Engineer

Parexel International

Nov 2017 – June 2025

Hyderabad, India

- Operated as a dual-track Architect and Lead IC, steering multiple engineering teams to primarily deliver enterprise Java cloud transformations alongside innovative AI/ML products.
- Led the end-to-end modernization of mission-critical legacy monoliths into highly scalable, decoupled microservices architectures using Java and Spring Boot.
- Engineered secure, full-stack enterprise applications featuring responsive Angular dashboards and high-throughput RESTful APIs, utilizing Hibernate/JPA for data modeling and OAuth 2.0/JWT for strict healthcare compliance.
- Directed a specialized AI innovation pod, deploying Agentic AI workflows and autonomous agents utilizing LangChain, CrewAI, and OpenAI to automate predictive modeling.
- Mentored diverse engineering pods across the tech stack, while accelerating internal business operations by delivering custom low-code solutions via Microsoft Power Platform.

Senior Software Engineer

Parexel International

Sep 2014 – Nov 2017

Hyderabad, India

- Spearheaded the design and development of scalable enterprise applications utilizing Java 8, Spring Boot, and Spring MVC, transitioning legacy monolithic architectures to decoupled microservices.
- Engineered dynamic, component-rich front-end interfaces for enterprise web applications leveraging JavaServer Faces (JSF), PrimeFaces, HTML, and CSS.
- Architected robust and scalable RESTful APIs using Spring REST, enabling secure and seamless data integration across distributed healthcare systems.
- Implemented efficient data access layers using Spring Data JPA and Hibernate ORM, improving transaction management and reducing database query latency.
- Developed multithreaded backend components using Core Java, driving a 20% improvement in application throughput and overall system efficiency.
- Governed technical quality by instituting rigorous architecture reviews, code inspections, and comprehensive unit testing frameworks using JUnit and Mockito.

Senior Software Engineer

Kony IT Services

Oct 2013 – Sep 2014

Hyderabad, India

- Directed architectural strategy for mobile applications using Kony Platform integration with Java/J2EE.
- Supervised design of resilient Enterprise Systems ensuring reliable, asynchronous data exchange.

Software Engineer

Wipro Technologies

Mar 2010 – Oct 2013

Hyderabad, India

- Supported enterprise-scale web applications using Java/J2EE, developing robust server-side logic and managing database interactions.
- Optimized Oracle 10g database interactions and managed application deployment in JBOSS environments to maintain system stability.
- Collaborated with cross-functional teams to deliver high-quality software modules for banking and financial sectors.

⚙️ CORE COMPETENCIES

Backend & AI Engineering

Java/J2EE, Spring Boot, Microservices
Python, FastAPI, LangChain
AWS Bedrock, OpenAI

Frontend Technologies

Angular, JavaScript, HTML5, CSS, JSF, PrimeFaces

Cloud Architecture

Azure (App Service, Container Apps, Functions, AKS, APIM, Managed Redis, Database for MySQL, Key Vault, Application Insights)
AWS (ECS, Fargate, EKS, Lambda, API Gateway, RDS, DynamoDB, S3, Cognito, Secrets Manager, ECR, CloudWatch)

Database & Storage

MySQL, PostgreSQL, Oracle, MS SQL, Redis

DevOps & Automation

Git, CI/CD, Azure DevOps, Jenkins, Maven, ANT

AI Tools & Low-Code

GitHub Copilot
Claude Code
Microsoft Power Platform (Power Apps, Power Automate, Copilot Studio, AI Builder)

Testing

Unit Testing, TDD, SonarQube

Security

Spring Security, JWT, OAuth 2.0, OpenID Connect (OIDC), RBAC

🌟 CERTIFICATIONS

- Microsoft GitHub Copilot (2026)
- AWS Certified AI Practitioner (2025)
- Azure AI Engineer Associate (2024)
- AWS Certified Developer Associate (2024)
- Azure Solutions Architect Expert (2022)
- Azure Developer Associate (2021)
- Power Platform App Maker (2022)
- Oracle Certified Programmer (2019)

🎓 EDUCATION

MCA (Master of Computer Applications)

Andhra University

March 2006

B.Sc. Computer Science

Andhra University

March 2003
