

Venkata Murali Kumar Chintala

Technical Lead

📍 Hyderabad, India | 📞 +91-9989225431 | ✉ muralikumar.ch@gmail.com | 🌐 chvmuralikumar

👤 PROFESSIONAL PROFILE

Highly accomplished Technical Lead with 15+ years of experience driving the creation of high-quality, scalable tech products across E-Commerce, Healthcare, and Banking domains. Proven track record of leading and mentoring dynamic software engineering teams to build engaging, high-performance platform modules for global users. Deep polyglot expertise combining advanced proficiency in Python ecosystems with a robust foundation in enterprise Java/Spring Boot architecture. Expert in end-to-end RESTful API development, performance tuning, and rigorous code reviews to ensure error-free deliverables. Adept at leveraging cloud platforms (AWS/Azure), containerization, and diverse databases to architect highly available microservices and seamless cross-functional integrations.

🏢 PROFESSIONAL EXPERIENCE

Technical Lead

RCG Global Services

July 2025 – Present

Chennai, India

- Directed cross-functional engineering pods, serving as the primary design and architecture authority for scaling resilient, high-availability enterprise platforms using Java, Spring Boot, and Azure microservices.
- Spearheaded an Agentic AI services ecosystem with strong command of Gen AI engineering patterns: prompt engineering, chain-of-thought reasoning, tool/function calling, vector embeddings, semantic search, and agent memory architectures.
- Maintained hands-on technical leadership applying excellent Python engineering skills, including async programming and API development (FastAPI), to build scalable, inference-ready microservices and architect robust data solutions.
- Engineered robust, responsive single-page applications (SPAs) utilizing Angular and TypeScript, seamlessly integrating sophisticated AI workflows and RESTful APIs into intuitive user interfaces.
- Championed engineering excellence and accelerated Agile delivery by institutionalizing AI-assisted coding methodologies across the SDLC, leveraging advanced code generation tools like GitHub Copilot and Claude Code.
- Elevated overall software quality and team velocity by enforcing Test-Driven Development (TDD), conducting rigorous architecture reviews, and modernizing CI/CD pipelines using Azure DevOps.
- Mentored and guided diverse engineering teams, bridging the gap between traditional enterprise architecture and emerging AI technologies to foster a culture of continuous innovation and technical ownership.

Principal Software Engineer

Parexel International

Nov 2017 – June 2025

Hyderabad, India

- Operated as a dual-track Architect and Lead IC, steering multiple engineering teams to primarily deliver enterprise Java cloud transformations alongside innovative AI/ML products.
- Led the end-to-end modernization of mission-critical legacy monoliths into highly scalable, decoupled microservices architectures using Java and Spring Boot.
- Engineered secure, high-throughput RESTful APIs and robust backends, utilizing Hibernate/JPA for complex data modeling and Spring Security (OAuth 2.0/JWT) to enforce strict healthcare compliance.
- Orchestrated the end-to-end development of dynamic front-end architectures using Angular, creating secure and highly interactive enterprise dashboards for complex data visualization.
- Directed a specialized AI innovation pod, deploying Agentic AI workflows and autonomous agents utilizing LangChain, CrewAI, and OpenAI to automate complex predictive modeling.
- Mentored diverse engineering pods across the tech stack, while accelerating internal business operations by delivering custom low-code solutions via Microsoft Power Platform.

Senior Software Engineer

Parexel International

Sep 2014 – Nov 2017

Hyderabad, India

- Spearheaded the design and development of scalable enterprise applications utilizing Java 8, Spring Boot, and Spring MVC, transitioning legacy monolithic architectures to decoupled microservices.
- Architected robust and scalable RESTful APIs using Spring REST, enabling secure and seamless data integration across distributed healthcare systems.
- Implemented efficient data access layers using Spring Data JPA and Hibernate ORM, improving transaction management and reducing database query latency.
- Developed multithreaded backend components using Core Java, driving a 20% improvement in application throughput and overall system efficiency.
- Governed technical quality by instituting rigorous architecture reviews, code inspections, and comprehensive unit testing frameworks using JUnit and Mockito.

Senior Software Engineer

Kony IT Services

Oct 2013 – Sep 2014

Hyderabad, India

- Directed architectural strategy for mobile applications using Kony Platform integration with Java/J2EE.
- Supervised design of resilient Enterprise Systems ensuring reliable, asynchronous data exchange.

Software Engineer

Wipro Technologies

Mar 2010 – Oct 2013

Hyderabad, India

- Engineered robust server-side business logic and dynamic, component-rich front-end interfaces for enterprise web applications utilizing Core Java, JavaServer Faces (JSF), PrimeFaces, HTML, and CSS.
- Implemented efficient data access layers and complex SQL queries using Hibernate ORM and JDBC for seamless integration with Oracle 10g.
- Configured and deployed scalable Java/J2EE applications across JBOSS and Tomcat server environments, ensuring high availability.
- Streamlined the software build and release lifecycle utilizing Maven for build automation and SVN.

⚙️ CORE COMPETENCIES

Domain Expertise

Healthcare, Banking, E-Commerce, Manufacturing, Media, CRM

Backend & AI Engineering

Java/J2EE, Struts, Spring
Spring Boot, Microservices, RESTful APIs
Python, FastAPI, LangChain
AWS Bedrock, OpenAI, Azure AI Foundry

Frontend Technologies

Angular, JavaScript, JSP, Thymeleaf, JSF, PrimeFaces, HTML5, CSS

Cloud Architecture

Azure (App Service, Container Apps, Azure Storage, Functions, AKS, APIM, Azure Managed Redis, Azure Database for MySQL, Key Vault, Application Insights)
AWS (Amazon ECS, AWS Fargate, Amazon EKS, AWS Lambda, Amazon API Gateway, Amazon RDS, DynamoDB, S3, Cognito, Secrets Manager, ECR, CloudWatch)

Database & Storage

MySQL, PostgreSQL, Oracle, MS SQL, Redis

DevOps & Automation

Jenkins, Maven, Git, SVN, Azure DevOps, CI/CD, Docker

AI Tools & Low-Code

GitHub Copilot, Claude Code, Microsoft Power Platform (Power Apps, Power Automate, Copilot Studio, AI Builder)

Testing

JUnit, Mockito, TDD, SonarQube

Security

Spring Security, JWT, OAuth 2.0, OpenID Connect (OIDC), RBAC

Leadership & Management

Team Leadership, Mentoring, Engineering Management, Agile/Scrum, Technical Strategy, Cross-Functional Collaboration, Risk Mitigation

🌟 CERTIFICATIONS

- GitHub Copilot Certification (2026)
- AWS Certified AI Practitioner (2025)
- Azure AI Engineer Associate (2024)
- AWS Certified Developer Associate (2024)
- Azure Solutions Architect Expert (2022)
- Azure Developer Associate (2021)
- Power Platform App Maker (2022)
- Oracle Certified Programmer (2019)

🎓 EDUCATION

Master of Computer Applications (MCA)

Andhra University
March 2006

B.Sc. Computer Science

Andhra University
March 2003
